Description
Centrifugal pumps with high suction power designed for the recirculation and filtration of water in dismountable or home swimming pools up to 128 m³. Pre-filter with transparent cap, anti-blocking seal and drainage spout. Supplied with suction and impulsion adaptors.

Materials
Pump casing, pump base, diffuser, impeller and seal mounting in technopolymer.
Stainless-steel drive shaft.
Mechanical seal in graphite and alumine.
Aluminium motor casing.
Windings mechanism impregnated with epoxy resin.
NBR gaskets.

Motor
Dual-pole, asynchronous. IP55 protection.
Class F insulation. Continuous operation.
Single-phase version with built-in thermal protector.
